Top Skills

Hands-on Training
AWS Lambda
Amazon Dynamodb

Certifications

Tavily certificated
M.A.D ClassNest : Certificate of Completion
M.A.D ClassNest : Certificate of Completion
The Complete Agentic AI Engineering Course (2025)
AWS Certified Solutions Architect – Associate

Honors-Awards

Yes camp mithr phol genai hackathon

Petcharat Limprasert

2x AWS cetificated (AI Practioner, SA associate), graduate computer engineering major IoT engineering
Bangkok City, Thailand

Experience

eCloudvalley Thailand
Cloud Engineer
April 2026 - Present (2 months)

Court of justice thailand
Data Scientist
April 2025 - June 2025 (3 months)
Bangkok City, Thailand

- AI Technology Researcher - Researched emerging AI technologies with a focus on RAG system design, OCR integration (e.g., Typhoon OCR, Mistral OCR), Agentic RAG, evaluation methods (LLM as a Judge, BERTscore), compared and evaluated model performance benchmarking from LLM Thai Leaderboard, while exploring AI product in legal field.
- AI Engineer - Designed and prototyped (Jass) a legal RAG application, Typhoon OCR for ingestion, BGE-M3 for multilingual embeddings, FAISS for retrieval, and a Streamlit UI powered by Gemma-12B.
- Technology Evaluation - Assessed emerging AI technologies through vendor presentations, analyzed suitability for organizational needs, and prepared strategic recommendations to guide leadership decisions.
- Data visualization - Built a Power BI monitoring system for the Court of Justice of Thailand, improving stakeholders' ability to track and evaluate operational performance.

Intern project:

- Jass Chatbot RAG Chatbot with OCR - Create JASS web application prototype by leading OCR integration, RAG system design, and solution architecture; implemented Typhoon OCR for legal document processing, applied data ingestion (chunking, metadata filtering), embedded multilingual data with BGE-M3 into FAISS, integrated Typhoon Gemma-12B for question answering, and deployed a prototype interface with Streamlit.
